

Easy Setup Wizard Checklist:

For Enterprise and Replay you will need a license key. License keys are purchased and then issued. The first step in the Wizard for Enterprise and Replay is to enter the key. For Pion Lite and Pion Core no key is necessary and none will be asked for in the Wizard.

Setup Your Web Site: Add your site domain(s) optional. Enter the suffixes for your site (i.e. yoursite.com)
Configure you site's cookies (optional): Enter the names of the cookies used by your site (i.e. php_cookie or JSESSIONID) Persistent Cookies and Session cookies)
Connect to Your Web Analytics Provider:
1. Google Analytics: Gooogle account information (e.g. UA-123456-0)
2. Omniture Genesis: Omniture Host (e.g. 112.2o7.net) and Report Suite
3. Unica OnDemand: Site and Unica Host (e.g. http://myaccount.unica.com)
4. Webtrends Analyitics: Account ID and Host
Select Capture Device: Pion will automatically detect all network devices on the network. Select either a device on the network, or the one on your local machine.
Configure Ports: The prepopulated ports of 80 (non-encrypted) and 443 (encrypted) are the standard defaults for most systems. If your port numbers are different, or if you have additional ports, you can add, edit and remove them here, using commas to separate multiple ports.
SSL keys are used by the web server to encrypt and decrypt secure traffic. Pion protects your keys in an encrypted database. Name, Password, Password, PEM is best cut and pasted from an email from your IT department.
